### I. CLIENT-SERVER SYSTEMS

Technology: Windows; Unix; SQL Server; Oracle; Sybase; Informix; DB2; Access; Visual Basic; Delphi; C/C++ and related tools

Applications:

- Fleet Policy Management System for AIG Small Fleet Division
- Order processing, bar coding and shipping system for Innotrak
- Credit Score Model Development System for Credit Strategy Management
- Long Range Business Planning System for Siemens Energy & Automation
- Credentials & Roster Management System for Office of School Readiness - State of Georgia
- Credit Card Registry System for Metris (Fingerhut)
- Property Management System for Norfolk Southern Railroad
- Data Warehouse assessment project for Grady Health System

### II. INTERNET & COMMUNICATIONS SYSTEMS

Technology: NT; UNIX; IIS; ASP; Java; Perl; HTML; VPN; Active-X; FTP; TELNET; HTTP; RDB Interface

Applications:

- Web portal for V2B Solutions
- Web Browser-Based Time Tracking for Nth Degree
- Call Center & Web-Based Reporting System for FleetSafe
- Collection of transaction data from designated Internet sites and conversion to Excel files for Bell Capital Management
- File transfer of Pacific Bell shipping orders to Innotrak via FTP
- Implementation of server software in DSL router equipment for Copper Mountain Networks
- Large-scale e-commerce site with on-line catalog for Buckshot Racing
- Website and backend database application for conference registration for Church's Fried Chicken
- Critical e-commerce site for selling computer parts for Computer Exchange
- Website for RealEstate.com

### III. NETWORK DESIGN, INSTALLATION & SUPPORT

Technology: Windows; Novell Netware; Unix; Citrix; ISDN; Internet  
Applications:

- Installed LAN and WAN for Smith & Sons Foods to connect user departments and the food distribution warehouse to the company's new financial management system
  - Installed WAN for private probation company with offices in several Georgia counties, and connected remote sites to user's host site via Internet using Citrix software
  - Installed WAN using frame relay to connect The Winston Group with its Golden Corral restaurants, including on-line camera monitoring
  - Upgraded LAN and added Internet access for Rebco Racing
  - Provide "on call" LAN support for Optimum Radiology and numerous other clients
- 

### IV. DATABASE SYSTEMS

Technology: Windows; Access; Visual Basic; FoxPro; Delphi; Paradox; Pick; MUMPS; Excel  
Applications:

- Inventory management system with interface to SQL Server based manufacturing system for BioLabs
  - Used FoxPro to develop business management software used for licensing administration, royalty accounting, contract compliance, etc for Collegiate Licensing Company
  - Used Access to create Order Tracking System that extracts selected data from Excel spreadsheets for Motorola
  - Used Access to develop Order Processing System that identifies products based on multiple optional parameters for Electrical Lighting Systems
  - Invoicing and billing application for Allied Materials
  - Developed client database for Emory Healthcare
  - Developed medical billing, inventory control, order entry and invoicing systems for wide range of clients
- 

### V. ACCOUNTING AND FINANCIAL MANAGEMENT SYSTEMS

Technology: MAS 90; Great Plains; Open Systems; Peachtree; Essbase; Excel; Access; Word; Crystal Reports; FRx; Citrix  
Applications:

- Aided in search and selection of LAN-based financial management software to replace old system that ran on obsolete hardware for Smith & Sons Foods
  - Designed and developed Excel application to accumulate and monitor marketing expenditures for Orkin Pest Control
  - Assisted SunTrust Bank in converting hundreds of non-Microsoft spreadsheets, word processing documents and database applications to their Microsoft equivalents (Excel, Word or Access)
  - Developed financial projection model for Agnes Scott College
  - Extracted financial reports from corporate database for BellSouth Cellular
  - Application to disperse \$18 million/month in lottery funds for pre-school programs for Office of School Readiness, State of Georgia
  - Supported Turner Enterprises using Open Systems
  - Set up systems for regional accounting firm to enable firm's clients to access their accounting records remotely using Citrix
- 

### VI. ELECTRONIC DATA INTERCHANGE (EDI) SYSTEMS

Technology: Sterling/Gentran; GEI Desktop; Harbinger  
Applications:

- Created ANSI X12 interfaces for Mudd, LLC to interface with retailers such as Federated Stores, J.C. Penney, Dayton-Hudson Group, etc.
  - Created ANSI X12 interfaces for Clean-Rite Products to interface with retailers such as Wal-mart, Sears, K-Mart, Pep Boys, etc.
  - Created NSF and ANSI X12 interfaces for Management Services Network, Medical Billing Management and several other medical billing companies to interface with Medicaid, Medicare and Blue Cross Blue Shield
  - Assisted All Magazine Subscription Agency in mapping their invoice format to EDI standards for interface with JCPenney
- 

## **VII. DOCUMENTATION, GRAPHICS & DESKTOP PUBLISHING**

Technology: FrameMaker; Adobe Photoshop; MS Publisher; PowerPoint; Word; WordPerfect; Macromedia Flash  
Applications:

- User manuals and disaster recovery plan for Scientific Games
  - Policies & procedures and user manuals for BellSouth
  - Test plan for BellSouth Advanced Networks
  - System documentation for Center for Disease Control (CDC)
  - Hardware manual for Lanier Worldwide
- 

## **VIII. AS-400 SYSTEMS**

Technology: RPG 400; COBOL 400; OCL; SEU; DFU; DMAS; MAPICS  
Applications:

- Converted legacy system to AS400 technology for Southern Engineering Co.
  - Barcode label application for Clinton County, MO
  - 2K readiness assessment for Embraer, a Brazilian aircraft manufacturer
  - Y2K project for Johnson & Johnson, Montreal
  - Ported MS C++ application to Visual Age C++ to run on AS400 for Witness Systems
- 

## **IX. LITIGATION SUPPORT**

Applications:

- Provided technical consultant and expert witness for Kirkland & Ellis in major IT-related case
- Provided mediator to resolve IT software litigation
- Assist client's defense against software piracy complaint

## About Consultants Exchange

*Consultants Exchange* is a unique and innovative company in the information technology (IT) consulting field, offering unparalleled value to clients and exciting opportunities to IT consultants. The company, headquartered in Atlanta, Georgia, has been in business in the Southeast for almost ten years. And through the Internet, Consultants Exchange is helping clients national-wide to get projects done *better, cheaper, and faster*.

Consultants Exchange represents a network of small to medium-sized consulting firms and senior IT professionals who specialize in a *broad spectrum of industries, platforms and technical environments*. We work regularly with these consulting partners and know what they do best. And we track their performance with the clients we refer via a Quality Service Survey completed by the client after every project.

Together, we form a Virtual Company that is *capable of doing almost anything in the IT field*. The concept of virtual companies is a perfect fit for the fast pace of the new millennium, where ad hoc project teams can come together in a flash and cease to exist just as quickly when the work is done.
